### REMARKS

The Applicant thanks the Examiner for examination of this application. This is a response to the Office Action mailed on December 8, 2010. Please consider the following remarks in support of allowing the claims.

#### 35 U.S.C. §103(a)

The new claims recite features that are not reasonably suggested by the references, alone or in combination. For example, the combination of references do not reasonably suggest inserting a particular number of position markers into each time interval of the first stream, and to communicate the number of markers per interval in the first stream to the set top box in a second stream.
